

Changes to iTMS

Message

iTMS was a custom-made web application made for agents using mobile devices.

It has now been phased out and replaced by a mobile-friendly responsive design in the existing More Service Agent Portal.

All you need to do is to point your browser to the same address you use today on your Desktop/PC.

Eg. <https://myname.tmsportal.no> or <https://myname.moreservice.com>.

The following addresses are no longer in use:

- <https://itms.tmsportal.no>
- <https://itms.technet.no>
- <https://m.moreservice.com>

Please notice that only the Service Desk has been made mobile-friendly for now.

We are still working on improvements in the Service Desk and we will move on to the other modules after that.
