

AzureAD

If the app is not activated follow [this guide](#) to activate an app in Moreservice.

In order to be able to configure the Microsoft Azure - AD app with the correct data, a setup must be done on Microsoft's cloud solution.

Follow this [user guide](#) to see how it is done

Click on the Microsoft Azure - AD app under Active apps

Active Apps

Microsoft Teams
Collaboration
More Service

More Service Sync
Sync
More Service

Microsoft - Azure AD
Connector
More Service

Apps

A dialog for the app will turn up

Microsoft - Azure AD
Connector
More Service

ConfigurationDescription

Connections

Configure a connection to Azure

Add connection ⓘ

Existing connections

No connections available, add a new connection by clicking the 'Add connection' button above

More Service Sync
Configuration of what is to be synchronized in Moreservice

ⓘ

CANCEL

SAVE

SAVE AND CLOSE

Tap Add connection, then give the connection a name and paste values from Azure ad. If you have not set up configuration on portal.azure.com, you can follow [this guide](#).

Add connection
✕

Name
amesistendant

App id

Client Secret

Tenant id

SAVE

After the necessary values have been filled in, press **Save**

The newly created connection will appear under **Existing connections**, if you are finished with the setup, press **Save** or **Save and close**.
