Changed background for mastermenu for test databases

Added new permission 'change log restricted' and implemented permission restriction for inbox and change log

Improved multi department support for system map

Added teamId to elastic search

Added new permission 'inbox restricted'

Change module: Adding a setting to remove the "Verified by system responsible" checkbox.

Fixes

10.2.63

- More service Elastic search now supports searching for objects in the case even if it is not in the log.

In addition, support has been added for exact searches for letters combined with numbers if you use a resin tag in front of the search: e.g. #INC23456

10.2.60

- Replace date with day.month.year on agent profile "marked vacation"

The screenshot shows a web form for an agent profile. It includes fields for First name (Gunn), Last name (Garvik), Username (gungar), Email (gg@technet.no), and Phone. There are also fields for 'Unavailable from' and 'Unavailable to', both with date pickers showing 'yyyy-MM-dd'. At the bottom, there are buttons for 'SAVE AND CLOSE' and 'SAVE'. On the right side of the form, there are links for 'RESET PASSWORD', 'EXCHANGE', and 'SIGNATURE'.

10.2.57

- If a database is a test database use the same software license as the prod database
- Changing text on azure ad description
- Updated formatting for CallTo tutorial for Teams in TMS App config
- Added "How to" in Teams configure app description
