

Service messages

Service messages are used to alert affected users during interruptions, information, downtime, scheduled maintenance, etc.

Service messages can be created from 3 different locations in More Service:

From a Request

+ CREATE SERVICE MESSAGE

Go to «Extra» tab

+ NEW SERVICE MESSAGE

Service desk>Settings>Service message link and create a

Title: The subject field from the case becomes the title of the service message. You can edit it.

Message: The text you want to send.

Groups: The user groups you want to receive this service message when logging in to user web, and with the option of receiving notification by email, will be added to "Selected Groups."

Case ID: The field displays case ID if the service announcement was created from a case.

Priority: If several service messages have been published at the same time, the priority will determine the order in the list displayed on user web.

Show from / to: The time frame you want the service message to appear on user web.

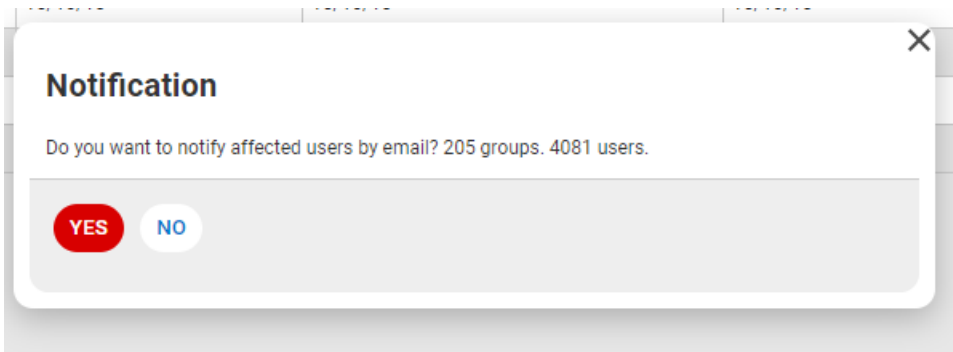

Working date from / to: These dates are shown in the email which is sent to users as well as shown in user web.

The screenshot shows a form titled 'Title' with a close button (X) in the top right corner. The form is divided into several sections:

- Title:** A text field containing 'Varsel om vedlikehold/ Notice of maintenance'.
- Message:** A rich text editor with a toolbar containing icons for bold (B), italic (I), underline (U), link (link icon), and image (image icon). The text area contains:
 - A link: [Mvh More Service support team](#)
 - A section header: **English**
 - Text: 'Technet will conduct infrastructure / server maintenance Wednesday, January 15 from 6pm to Thursday morning at 6am. Consequences: The service More Service (TMS) can be unstable for the time period.'
 - Text: 'If you have any questions, contact the help desk on tel.+47 33 48 59 70 or e-mail helpdesk@technet.no'
 - Text: 'Best regard More Service support team'
- Groups:** A list box on the left and a 'Selected groups' list on the right. The 'Selected groups' list contains:
 - 10082 - Signo
 - 10475 - Matiq
 - 10537 - Midt-Telemark
 - 10537 - Midt-Telemark Teknisk Etat
 - 10558 - Rana Kommune
 - 10664 - Østfold Fylkeskommune
 - 10738 - IKT Hallingdal (Gol kommune)
 - 10770 - Digitale Gardermoen IKS
 - 10778 - Laheraft
- ☐ Show only groups in my department
- Case ID:** A text field, highlighted with a red rectangle.
- Priority:** A dropdown menu set to 'Normal'.
- Show from:** A date field set to '15/01/20'.
- Show to:** A date field set to '15/01/20'.
- Work date from:** A date field set to '15/01/20'.
- Work date to:** A date field set to '15/01/20'.
- SAVE:** A green button at the bottom left.

When you save the service announcement, you will be asked if you want to send email to affected users:

- If you answer **Yes** all users in the selected user groups will receive an email with the message, and the service announcement will be shown in user web - If you answer **no** all users in the selected user groups will only see the message on More Service Portal .

When the case closes, you will be prompted to delete the service message:

Operation Log

Operation log can be sent from the "Extra"-tab, using the email template "Operation log". Info to agents.

From the «Extra»-tab you can also use "Operations log"

Operation log has options for a pre-filled email template. The template can be found under «Admin» - «Email» - «Log».

The notification can be used if you wish to inform all other agents in your organization about a particular issue.

From System Map (CMDDB)

Right-click on item and select "Create service message":

From the Settings tab

Here is the list of all operating messages and you can create a new operating message regardless of case type or item. You can also re-use a previous service announcement. By changing date, it will be visible again.

Right menu

In the left menu, you can add the service message area and get quick access to active messages. You can also open the message from here.
