

8.6.0

Release date: 21 sep 2020

Improvement

- Inline images in case templates
- Changed default subject text for the bundle update email

New Feature

- Case - Private log can be set as default
- Case - > Log: Set log/email as private after it has been logged
- Added functionality for printing extra short version of a case
- Case -> Worklog: Show a single log item
- Asset assignment to a person
- Show new version released dialog
- API: Added API / GAPI endpoint for system messages

Bug

- Servicedesk overview: Made pink color prioritized for merged children
- Settings Case templates: The fields description, solution, subject now supports more data (larger images, etc)
