Type	Description	Illustration (click the picture to see a large version)
Bugfix	Fixes an issue where you sometimes could not remove an object type from the System Map.	 The screenshot shows the 'System map' interface in a 'Service Desk' application. At the top, there are tabs for 'Service Desk', 'System map', and 'Asset'. A search bar is on the right. The main area is divided into several sections. On the left, there's a 'Choose department' dropdown set to 'Standard' and a circular diagram with icons for 'Model', 'Bil', 'Gravemaskin', 'Lokasjon', 'Lasterbil', 'Leverandør', 'Ekstraustyr', and 'Varehenger'. Below this is a 'Position Map' with a grid of points labeled POS 1 through POS 8. In the center, the 'System map objects' list contains: 1. Bil, 2. Gravemaskin, 3. Lasterbil, 4. Varehenger, 5. Ekstraustyr, 6. Leverandør, 7. Lokasjon, 8. Model, and 9. Inventar. The 'Inventar' item is highlighted. To the right of this list is the 'Object types' section, which currently shows 'Avløp', 'Bygg', and 'Dokumentasjon'. A red arrow points from the 'Inventar' item in the 'System map objects' list to the 'Object types' section. On the far right, the 'New object type' form is visible, with fields for 'Name' (set to 'Inventar'), 'Id', and 'Icon from file' (with a 'Choose File' button). There are also checkboxes for 'Service Catalog' and 'More Service Portal', and buttons for 'NEW', 'OPPDATER', and 'DELETE'.
