Improvement

Change Send to CAB was slow

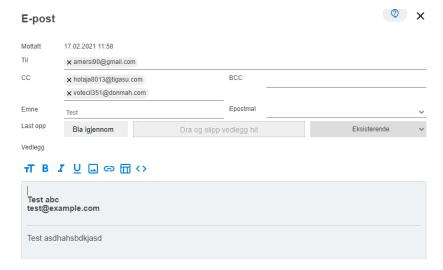

• Improvements were made to make sure the e-mail "Send to CAB" no longer takes a long time to send.

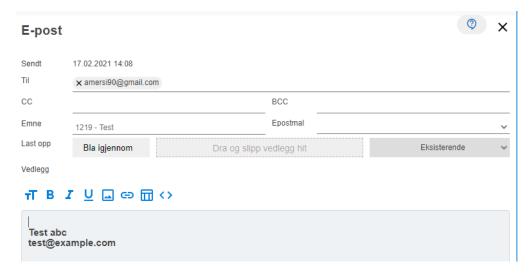

New case from email need to contain the original e-mail

Show to field when expanding email log:

Show date when email was sent/recieved when using reply to:

Send schema / forms by email from the Agent Portal

New button for sending schema to others from the Agent Portal.
 When send is clicked, a PDF is generated and an email dialog opened, PDF is attached to email dialog.

In Team settings, the receipt template selector did not work correctly

• Need to be logged in with a agent that was in the same operating unit as the team that was edited. This has now been fixed.

Automatic email reminder to approve or decline a form

• Now works for both the old and the new form module and is running again.

Search by category in advanced search did not work

• Searching by category for cases in advanced search did not work.
